

Anticipated AI-Related IPOs for 2026-2027 (as of May 14 2026)

Several well-funded artificial-intelligence companies have signaled plans or been rumored to go public in the 2026–2027 timeframe. The table below summarises the firms most often cited in credible reports, along with the status of each potential IPO, the best available timing estimates and relevant sources.

Overview of companies

Company (sector)	Evidence of IPO plans	Expected IPO timing (approximate)	Commentary & sources
Cerebras Systems – AI chips	The AI-hardware company announced on May 13 2026 that it priced its IPO at \$185 per share . Its press release states that the shares would begin trading on the Nasdaq Global Select Market under the ticker “ CBRS ” on 14 May 2026 ¹ .	Actual IPO (May 14 2026).	Cerebras is one of the first pure-AI hardware firms to go public during this cycle. It priced 30 million shares and began trading on 14 May 2026 ¹ . Future watchers should note that the offering closed on 15 May 2026 ¹ .
OpenAI – generative AI	Reuters reported in Oct 2025 that OpenAI is considering filing with regulators as early as the second half of 2026 and that CFO Sarah Friar told associates the company is aiming for a 2027 listing ² . The same report notes that some advisers think the offering could occur as early as late-2026 ² .	Late 2026 – 2027 (unconfirmed).	OpenAI has not officially committed to an IPO date. The company needs large amounts of capital to build its data-center infrastructure, and a public listing would help raise funds. However, an OpenAI spokesperson told Reuters that an IPO is “not our focus” ³ . Investors therefore expect a filing sometime in 2026 with a possible listing in 2027 ² .

Company (sector)	Evidence of IPO plans	Expected IPO timing (approximate)	Commentary & sources
Anthropic – generative AI (Claude)	The Financial Times (summarised by Forge Global) reported that Anthropic hired the law firm Wilson Sonsini and is gearing up for an IPO that could happen as soon as 2026 ⁴ . Another insider cautioned that such a quick timeline might be ambitious ⁵ .	As early as 2026 (under preparation).	Anthropic has raised >\$23 billion and is valued around \$183 billion. Forge Global notes that the company is preparing for an IPO but has not set a definitive date ⁴ . A subsequent funding round and market conditions could move the listing to 2027 ⁶ .
SpaceX/xAI – space & AI infrastructure	Built In's 2026 IPO watchlist reports that Elon Musk filed confidential IPO paperwork with the Securities and Exchange Commission and that SpaceX could begin trading as early as July 2026 ⁷ . Musk's plan to expand compute capacity (including via the acquisition of xAI) motivates the listing ⁸ .	Likely mid-2026 (July 2026 target).	SpaceX (after acquiring Musk's AI start-up xAI) aims to raise capital for rocket launches and AI-driven satellite-computing projects. Reports indicate that a consortium of banks has been tapped to lead the offering ⁹ , but no final prospectus has been filed.
Cohere – enterprise LLM provider	Crunchbase notes that Cohere (co-headquartered in Toronto and San Francisco) supplies AI models to enterprises and governments and that CEO Aidan Gomez expressed interest in a public listing in the near future ¹⁰ . The company had ~\$150 million in annual recurring revenue and a \$7 billion valuation as of 2025 ¹¹ .	Probable in 2026–2027 (no date filed).	Because Cohere competes with OpenAI and Anthropic, analysts believe it may go public to access public capital. Crunchbase calls it a “probable” IPO candidate ¹² but there is no official filing, so the timing is speculative.
Databricks – AI & data analytics platform	Built In reports that Databricks has raised more than \$4 billion and its CEO says it has been “IPO ready” since 2020 ¹³ . The company recently hired a CFO with deep IPO experience and has predictable revenue ¹⁴ .	Uncertain; market watchers expect 2026–2027.	Databricks has not publicly filed for an IPO. Analysts expect it could take advantage of AI market enthusiasm in 2026 or 2027 to fund expansion of its Lakehouse platform ¹⁵ .

Company (sector)	Evidence of IPO plans	Expected IPO timing (approximate)	Commentary & sources
Quantinuum – quantum computing (AI-adjacent)	Crunchbase highlights Quantinuum (formed from Honeywell Quantum Solutions and Cambridge Quantum) as a “probable” IPO candidate . A Barron’s report cited by Crunchbase says that parent company Honeywell aims for a 2026 or 2027 listing ¹⁶ .	2026–2027 (parent company target).	Although not purely an AI company, Quantinuum’s quantum computing technology is used in advanced AI applications. Its 2025 Series B (backed by Nvidia) valued it at \$10 billion ¹⁷ . Honeywell’s IPO timing is still subject to market conditions.
Anduril Industries – defense tech with AI capabilities	Crunchbase lists Anduril as a “very likely” IPO candidate . The company raised \$2.5 billion in a 2025 Series G and provides AI-enabled defense products. Crunchbase notes speculation that Anduril could go public after SpaceX ¹⁸ .	Possible 2026–2027 (no formal filing).	Anduril uses artificial-intelligence to develop autonomous defense systems. The company’s fundraising and government contracts may position it for a public offering, but there is no announced timeline ¹⁸ .
Quantinuum (K2 Space, etc.) – AI-enabled space tech	The Crunchbase report also notes that K2 Space , which develops high-power satellite platforms, has raised over \$400 million and is viewed as a probable IPO candidate ¹⁹ . The prospect of a SpaceX IPO has raised investor interest in space tech ²⁰ .	Speculative 2026–2027.	K2 Space uses AI and advanced computing to manage satellite missions. No formal IPO documentation exists; predictions revolve around industry momentum.

Key takeaways

- **Few AI-related companies have committed dates.** Among the major AI labs, **Cerebras Systems** is the only one with a *confirmed* IPO in this window, beginning trading on **May 14 2026** ¹.
- **OpenAI and Anthropic are in preparation but have not filed.** Reuters reports that OpenAI is aiming for **late-2026 or 2027** ², while Forge Global notes that Anthropic is **gearing up for an IPO as soon as 2026** ⁴. Both timelines depend on market conditions and capital needs.
- **Several secondary players may follow.** **SpaceX/xAI, Cohere, Databricks, Quantinuum, Anduril** and **K2 Space** are frequently cited as 2026–2027 candidates ⁷ ¹². None have publicly filed prospectuses, so investors should monitor news for updates.
- **Timelines remain fluid.** Reports emphasise that these IPO windows are estimates; economic conditions, AI adoption rates and each company’s financial performance could accelerate or delay

offerings. Staying tuned to official filings with the U.S. Securities and Exchange Commission is essential.
